A FALLING OFF IN DEPOSITS

Business of Local Retailers Seriously Affected by the Street-Car Strike.

An Uneventful Day in Grain, Wheat and Corn Being Firm and Oats Easier-Some Unimportant Changes in Other Commodities.

MONEY AND STOCKS.

The Street-Car Strike Affects the Deposits of Retailers-Clearings and Balances.

The street-car tie-up affects down-town retailers more seriously as it progresses. This is especially true in dry goods and other lines in which women are the chief patrons. In consequence there is a marked falling off in the deposits of retailers. Merchants console themselves with the reflection that, bad as it is, it might be worse, and are thankful that it has come before the spring sale is on and when busi-. ness is naturally light.

The Indianapolis Clearing-house Association reported yesterday's clearings to be \$698,124.08; balances, \$76,075.68. On the corresponding date last year the clearings were \$635,121.96; balances, \$54,500.56.

NEW YORK QUOTATIONS. At New York yesterday money on call was easy at 11/2 to 2 per cent., the last loan being made at 2, closing offered at 2.

Prime mercantile paper, 34 @51/2 per cent. Eterling exchange was quiet but steady at \$4.85% for sixty-day bills and \$4.88 for demand.

The total sales of stocks were \$21,484 shares, including the following: Atchison, 10,895; Chicago Gas, 30,400; Delaware, Lackawanna & Western, 19,450; Erie, 8,460; Louisville & Nashville, 4,700; Northern Pacific preferred, 12,925; New England, 13,-007; Reading. 31,700; Richmond & West Point, 4,304; St. Paul, 22,557; Union Pacific,

The stock market subsided into real oldfashioned duliness yesterday, and with but few exceptions the whole list was traded in within the narrowest limits, prices for the most part showing no de-cided tendency in either direction. There was disposition to take advantage of the buying by arbitrage brokers Tuesday to put up prices in the early dealings, but London yesterday became a seller, especial-ly of St. Paul. The opening of the market reflected to the lower London figures and the selling of arbitrage brokers on this side, but prices in the general list stiflened up immediately despite the substantial drop in Lackawanna to 154. The upper movement, however, reached no more than fractions and the market then dropped into the most intense duliness, the equal of which has not been seen since last summer. Liquidations were more and more numerous, however, as the day were along, and these sales finally induced further selling for the short account, which was specially prominent in Chicago Gas. That stock broke badly in the last hour, reaching 764s after selling at 785s. Great activity prevailed for the time being in St. Paul and Northern Pacific preferred, while the amount of luminess done in the while the amount of business done in the rest of the list was large. Prices deand the lowest prices of the day were reached in almost every case. No rally occurred, although there was evidence of considerable covering in the last few minutes, and the market closed active and weak at about the lowest figures of the day. The final changes were all losses, but generally for small amounts, while Chicago Gas lost 2%, Lackawanna, Northern Pacific preferred and Reading each 14, Union Pacific 1%, and Rock Island, St. Paul, Louisville & Nashville, Missouri Pacific and Wheeling & Lake

Erie preferred each 1 per cent. Railroad bonds were quiet and still irregular in their movements, with little feature of a special nature and few marked movements. The total transactions were only \$1,685,000, but they were distributed over a large number of issues. Government bonds were dull and easier.

State bonds wers entirely neglected. Closing quotations were: Four per cent. reg1163 Louis. & Nash..... 7418 Four per ct. coup..1163 L. & New Albany.. 2658 Pacific 68 of '95 .. 109 Missouri Pacific... 61 N. J. Conveyances, 29; consideration....\$52,135.00 A Cow to Each Acre. One cow for each acre of land in the farm is the mark set by a few—a very few—of our most progressive dairymen. They have succeeded in doing this, and are inclined to intimate that those who cannot, or do not, do this are behind the times. Now, let us examine this point a minute. In-tensive farming is all right, and will grow more and more in favor, but we can go far enough to eat up all the profits, even if sales are large. There is a golden mean that brings the most clear money from any

A cow to each acre can be kept only by high manuring of land, soiling, and heavy outlay for labor. If land is high in price and labor is plenty, then this intensive form of dairying is all right; but on cheap land it may cost less to maintain a cow on two acres than one. She can do her own harvesting half the year. Pasture on fair soil furnishes cheap food usually, and one may lose by undertaking to double the feed grown on such land, when it must be harvested for the stock. Progress must

always mean increase of profit.

For tilled crops the Post Farmer believes in extensive farming, varying in degree according to nearness or remoteness from market. We must travel that road. When we put labor on land we want the soil capaou returns. I the case is somewhat different. If we can raise a crop that requires little or no labor. one that the cows can harvest, it is often the best paying one, even if two or three acres of it are required to keep a cow a year. Until land doubles in value soiling will not become popular except as it supplements the pasture, and without soiling, one cow to each acre is an impossibility.

Odds and Ends. A corn cob will scour out dirt easier and better than many of the cheap scrubbing brushes sold now.

culty, wrap a piece of muslin around your finger to pull against. Put camphor on cold sores when they first come, and it may heal them or prevent

When pin feathers come out with diffi-

them from developing. Beeswax and salt will make rusty flatirons as clean and smooth as glass. Tie a lump of wax in a rag and keep it for the purpose. When the irons are hot, rub first with a wax rag, and then scour them on a paper or cloth sprinkled with sait.

Pillow-ticks may be kept fresh for years without washing or renovating by the use of slips made of thick silesia and buttoned closely on. These slips do not take the place of the regular white pillow-case, but are merely intended to protect the ticking. Wash these covers once in six months.

In making mustard plasters many peo-ple lessen the strength of the mustard by adding an equal portion of flour-lest the plaster blister. Omit the flour and mix the mustard with the white of an egg instead of with water, and the plaster, however fiery, will not blister a baby's skin. When putting kettles and pots to soak. after having been used for cooking sonps, stewsor any greasy food, if a few drops of household ammonia is added to the water, and the vessels left to soak about five minutes, there will be no difficulty in cleaning them, for the ammonia does all the hard

labor and there will be no necessity for One who has had experience with both oiled and painted floors recommends the former, and says she prefers burnt umber with boiled linseed oil. Rub it in thorongbly with a woolen cloth. The umber can be bought in boxes containing a pound and upwards, already ground in oil, which is most convenient, as that sold in a dry

state is apt to be coarse and rough. A French authority on cooking gives the following rules for testing the heat of an oven: "Try it with a piece of white paper; if too hot, the paper will blacken or blaze up; if it becomes a light brown, it is fit for pastry; if it turns dark yellow, it is fit for bread and the heavier kinds of cake; if light yellow, the oven is ready for sponge cake and the lighter kinds of desserts." The discovery of new varieties of strawberries is within the ability of every one who grows them. By sowing the seed, and

carefully preserveing and selecting the young plants, there will be a possibility of

securing a variety much better than any

known, but a large majority of the young

plants will be worthless as far as quality

of fruit is conceoned. Nearly all of the

best varieties of fruit are accidental dis-

with Other Facts, Cansed a Rise.

Chicago Pits Were Largely Influenced by Bradstreet's Reported Heavy Decrease in Available Supplies Last Week.

TRADING AT CHICAGO.

Better Tone in Wheat Lent Decided Aid

CHICAGO, Feb. 24.-Wheat showed considerable strength to-day and closed at an advance of 34c. Cable news was not enconraging, as Liverpool and London were both lower. But the offerings were light and the general outlook for the wheat situation in the world at large was regarded as rather bullish. The decrease in the available supply as reported by Bradstreet's was large, amounting to 1,204,000 bushels last week, and was regarded as a strong factor, while there was also some talk of a cold wave in the West. Logan, Schwartz-Dupee and other prominent houses had buying orders, and there was little offered, and a strong feeling ruled. Trade was not large at any time. The proposed measures for the suppression of puts and calls excited much discussion, and possibly interfered considerably with the regular business. During the last hour further reports of weather unfavorable to the winter wheat crop made shorts niteasy, and they proceeded to cover, adding to the strength of the market. May opened at 92%c, advanced gradually to 93c, weakened to 92%c, railied to 93c again, held steady for a time, then went to 93%c, weakened some, and closed steady at 98c, against 92%c at the close yesterday. Corn was more active and strong. The better tone in wheat helped it, and the receipts were also disappointing, being only 436 cars, or about one hundred cars below the estimate. Shorts were rather nervous and covered a good deal, while there was more speculative buying than usual. The export business continues good and Brad-street's reported a decrease in the available supply of 225,000 bushels last week. May opened 'se higher, at 41%c, and, with immaterial reactions, advanced to and closed

Oats were quiet but firm, in sympathy with wheat and corn, and advanced 4c. Hog products were strong and higher, with a good demand and less offered for sale. The opening was at yesterday's closing price, and the price advanced slowly most of the day, closing at the top. Pork shows an advance of 17½c, lard .07½c and Estimated receipts for to-morrow are:

Wheat, 160 cars; corn, 290 cars; oats, 160 cars; hogs, 25,000 head. The leading futures

-THE-

DAILY, SUNDAY AND WEEKLY.

The Journal is first of all a newspaper. Its primary object is to publish the news, and to secure this it spares no pains or expense. Besides the service of two great news agencies, which cover foreign countries as well as the entire United States, it has a corps of Special Correspondents, who give attention to those events and occurrences that are likely to be of particular interest to the Indiana public. Its Washington bureau was established for the purpose of looking after matters in which the State and its people are concerned, and is under the management of an Indiana man well acquainted with the local business and political issues. It has a correspondent in every town of importance in the State, and is constantly increasing its facilities for obtaining information from every quarter. Its staff of city reporters is large, and its local departments are unexcelled. As a newspaper it is far better equipped than any other in the State, and welcomes comparison with its contemporaries in any and all of its departments. With all it endeavors to be accurate and trustworthy, printing the news, whatever it may be, without personal or partisan

But while the Journal is non-partisan as to news, it is a Republican paper, and sets forth Republican principles. It is important that the people shall read the truth about these principles, and it was with the object of putting everybody in the way of doing so that the price of the

- Was reduced to -

No other method of securing a Repubthe circulation of Republican papers among voters. Since the reduction in the price thousands of subscriptions have poured in from all parts of the State, showing that a need was supplied. In order to have the proper influence and effect upon voters seeking for trustworthy information the Journal should go into their hands at once, and not next spring or summer. Clubs are being formed and agencies established where ever daily mails reach, and as rapidly as traveling agents can visit the places, but Republicans in each and every locality cannot do their party greater service than to interest themselves in circulating the Journal.

The Sunday Journal

Is a paper that gives more attention to miscellaneous literature than the other editions, and contains in its sixteen, and often twenty, pages a variety of
